

How will the project affect me?

Short term impacts:

- Extended commute times during construction activity
- Reduced speed limits through construction zones
- Noise and dust in the construction area

Long term benefits:

- Additional capacity will improve mobility and provide better traffic flow
- Improved safety
- Decreased emergency response times
- Turn lanes will minimize congestion
- Dedicated at-grade crossings increase bike and pedestrian safety
- New and continuous bike lanes, sidewalk, and curb and gutter
- Improved drainage along the corridor
